linkedin.com/in/jonatan-verstraete

Frontend engineer who starts from friction: notice what slows people down, own the fix end-to-end, then automate it so it stays fixed.

EXPERIENCE

Frontend Engineer — Bricsys 24/7 (Hexagon AB)

Sep 2023 - Mar 2026

Enterprise SaaS · CAD / BIM · React, TypeScript

- Conversion of Vue 2 to React as part of a migration using Module Federation (team effort).
- Built near-real-time projection of 3D annotations into 2D space for the browser based BIM viewer using React and CSS transforms across both 2D and 3D repos with shared functionality.
- Diagnosed and resolved critical localization failures after global Keycloak upgrade by implementing scalable language and dialect support and automating translation workflows.
- **Daily tasks included:** feature design, releasing (Azure), cross team feature ideation, writing documentation, component performance measuring, i18n/i11y, testing... etc.

PROJECT HIGHLIGHTS

Timesheet Automation

Headless background process and CLI that pulls Git commits and PR data to auto-fill R&D entries into the internal Bricsys timesheets app. Turned a slow manual daily/weekly process - on an outdated UI - into an optional quick review.

Fluidity-js

Published React library for interactive fluid effects on text and images — water, ink, glass, aurora. WebGL shaders running off the main thread via a Web Worker; strict TypeScript, CI. Shipped on npm as [@jayf0x/fluidity-js](https://www.npmjs.com/package/@jayf0x/fluidity-js).

PIIPAYA

Local macOS app (Tauri/Svelte/Python) that redacts PII from documents while keeping the narrative coherent — James instead of NAME. OCR, PDF/DOCX, file batching; fully offline, shipped releases.

SKILLS

Core: React · TypeScript · JavaScript · Tailwind/SASS
AI/Tooling: Claude Code · Python · Ollama · Bash
Ecosystem: TanStack · Zustand · Node · Vite
Experienced: Vue2 · Playwright · Tauri · Three.js · Figma
Languages: Dutch (native) · English (C2) · French (B1)

EDUCATION

BA — Graphic and Digital Media

2019 - 2023

Artevelde University of Applied Sciences, Gent

- Full dev lifecycle: Concept → design (Adobe XD) → product (React/Python) → marketing (Indesign)
- Graduation project: developing route-optimizations for city waste management services Renewi.

PERSONAL

History and philosophy nerd. Chess with Boomers. Wear odd socks on purpose.
