Experience

Frontend Engineer — Bricsys 24/7 (Hexagon) Sep 2023 - Mar 2026

Enterprise SaaS · CAD / BIM · React, TypeScript

- Conversion of Vue 2 to React as part of a migration using Module Federation (team effort).
- Built real time (NRL) projection of 3D annotations into 2D space for the browser based BIM viewer using React and CSS transforms across both 2D and 3D repos with shared functionality.
- Strategic support cross teams, eg. implementing form-validation, popover to Bricsys internal component library
- **Daily tasks included:** feature design, releasing (Azure), cross team feature/bug ideation, writing documentation, component performance measuring, i18n... etc

Podcast Tooling & Production - [BLANC.zone](#) Jan 2022 - May 2026

- Maintained website, social media and handled editing workflows.
- Explored AI-assisted automation (transcription, summarization) to reduce manual editing effort.

Game Dev (part time) at [Curve Fever](#) April 2026 - present

- Maintain game and prep release on [Steam](#)
- Playing since highschool, now ["going pro" \(Steven Pressfield\)](#)

Project Highlights

Timesheet Automation Headless background process and CLI that pulls Git commits and PR data to auto-fill R&D entries into the internal Bricsys timesheets app. Turned a slow manual daily/weekly process into a quick review.

[fluidity](#) WebGPU-first fluid simulation React library with Navier-Stokes solver. Supports text and image effects with fallback to WebGL2/WebGL1. Features advection, divergence, pressure, and vorticity solving with multiple rendering algorithms (standard, glass, ink, aurora, ripple). Runs in Web Worker via OffscreenCanvas for optimal performance.

[PIIPAYA](#) Local macOS app that anonymizes sensitive documents while keeping the narrative intact. Replaces names, dates, emails and other PII with consistent pseudonyms using a deterministic seeding layer on top of Microsoft Presidio, so anonymized text stays coherent for LLM analysis or human review.

Skills

Core[5/5] React · TypeScript · JavaScript (ESNext) · HTML · CSS/SCSS/Tailwind
Comfortable[4/5] NodeJS · TanStack (Query, Form, Router, Table...) · Zustand · Canvas API ·
Claude Code Experienced[3/5] Python · Vite · Playwright/Cypress · Storybook · Ollama · Bash ·
Vue 2 Honorable mentions PHP · Adobe Suite · Three.js · p5.js · Keycloakify · vMLX · Blender
· Svelte · Tauri · Logic Pro x · WhisperX/FastWhisper · Keycloakify Languages Dutch (native) ·
English (C2) · French (B1)

Education

BA — Graphic and Digital Media 2019 - 2023
Artevelde University of Applied Sciences, Gent

- Full dev lifecycle. Concept, design (sketching -> XD), product (React/Python), marketing (Indesign)
- Graduation project: developing route-optimization for city waste management services Renewi.
